

What is claimed is:

- 44B  
A1
1. An antislip fabric of the type ~~capable~~ of maintaining garments such as trousers and shirt or skirt and blouse in place with respect to each other, the antislip fabric comprising two different warp threads interlaced with weft threads in the form of leno weave.
  2. The antislip fabric as set forth in claim 1 wherein one of the two different warp threads is polyurethane bare yarn.
  3. The antislip fabric as set forth in claim 2 wherein the other of the two different warp threads is polyurethane double covered yarn.
  4. The antislip fabric as set forth in claim 1 wherein the weft threads are polyester monofilament.
  5. The antislip fabric as set forth in claim 1 wherein ~~the weaving~~ is done to provide a roughened or irregular surface having a plurality of spaced-apart nubs ~~formed~~ on both sides of each gap between two adjacent weft threads.
  6. The antislip fabric as set forth in claim 5 wherein the plurality of spaced-apart nubs are formed by interlacing loose warp threads of polyurethane bare yarn and weak tensioned warp threads of polyurethane double covered yarn with weft threads.
  7. An antislip strip useful in ~~maintaining~~ garments such as trousers and shirt or skirt and blouse in place with respect to each other, wherein the antislip strip comprises two different warp threads interlaced with weft threads in the form of leno weave.
  8. The antislip strip as set forth in claim 5 wherein one of the two different warp threads is polyurethane bare yarn.
  9. The antislip strip as set forth in claim 6 wherein the other of the two different warp threads is polyurethane double covered yarn.
  10. The antislip strip as set forth in claim 5 wherein the weft threads are polyester monofilament.
  11. The antislip strip as set forth in claim 5 further comprising two opposed edge portions in the form of plain or hollow weave.
  12. The antislip strip as set forth in claim 9 wherein the two opposed edge
